

# CASTLE CREEK CORRIDOR IMPROVEMENT PROJECT

## Construction Phase I

# WORK AREAS AND TRAFFIC CONTROL MAP

### TRAFFIC INFORMATION

Within the work area (in blue) expect periodic lane closures (one lane of traffic, alternating one way). The length of lane closures will vary based on construction activities. Crews may be working in multiple locations within the work area. Most of the work will occur along the west/uphill side of the road. Temporary traffic signal devices will be used. Flaggers will be in the area as needed during the daytime. Cyclists should queue behind vehicles in closure areas.
